

**SPECIFICATION AMENDMENTS**

Please amend paragraph [0040] as follows:

[0040] The foregoing and other objects and advantages are realized by providing a method for controlling network digital broadcasting service, including the steps of: directly requesting, at a client, a digital broadcasting server for a session connection, and establishing a session by receiving a confirmation from the digital broadcasting server; directly requesting, at the client, the digital broadcasting server for a program change, or channel change, and changing a program (channel) by receiving a confirmation from the digital broadcasting server; receiving, at the client, a message for checking a status of the client from the digital broadcasting server, and directly delivering a confirmation message from the client to the digital broadcasting server; and directly requesting, at the client, the digital broadcasting server for a session termination and terminating a session by receiving a confirmation from the digital broadcasting server.
